

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

## CONTENTS

*The Relation of Electrical Engineering to other Professions:* GANO DUNN ..... 161

*Honorary Degrees at the University of Michigan* ..... 166

*The Funeral of M. Henri Poincaré* ..... 167

*Scientific Notes and News* ..... 168

*University and Educational News* ..... 171

### *Discussion and Correspondence:*—

*Zoological Nomenclature:* PROFESSOR J. S. KINGSLY. *Dome Theories as applied to Gulf Coast Geology:* PROFESSOR G. D. HARRIS ..... 171

### *University Control:*—

*Letters from Cornell University; Letters from the University of Chicago* ..... 174

### *Scientific Books:*—

*Nutting's Outlines of Applied Optics:* PROFESSOR W. LECONTE STEVENS. *Scharff on the Distribution and Origin of Life in America:* PROFESSOR ALEXANDER G. RUTHVEN. *Recent Antarctic Work:* DR. W. H. DALL ..... 186

### *Special Articles:*—

*A Case of Sex-linked Inheritance in the Domestic Pigeon:* PROFESSOR LEON J. COLE. *The Intertubercular or Bicipital Foramen of the Humerus of the Guinea-pig:* PROFESSOR LEONARD W. WILLIAMS ..... 190

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

## THE RELATION OF ELECTRICAL ENGINEERING TO OTHER PROFESSIONS<sup>1</sup>

ON the wall of a great engineering library is the legend "Engineering is the art of organizing and directing men, and of controlling the forces and materials of nature for the benefit of the human race." This is broad and all-embracing, but other professions will find it hard successfully to quarrel with it. While the immediate object of engineering is a material one, engineers draw from many different channels of human energy, such as generalship, commerce, psychology, mechanics, economics, to say nothing of chemistry and physics and many others, all under an interpretation, insight and method that are best described by the term scientific.

It may be asked, Why could not a similar statement of embrasure or scope apply to medicine, the law, the army and other professions? In part it could, but it is to engineering that it applies preeminently. The subject-matter of the older professions, the things about which they busy themselves, and the objects they seek to accomplish have changed relatively little in many centuries. The means have altered but the ends persist. They are approximately the same to-day as they have been throughout history and tradition. With engineering it is different. There was no such profession a hundred and fifty years ago, and if I may a little anticipate my conclusion, there will be no such profession a hundred and fifty years hence in respect to a large part of what we now call engineering.

<sup>1</sup> President's address presented at the twenty-ninth annual convention of the American Institute of Electrical Engineers, Boston, Mass., June 25, 1912.
